

Scan it, See it.

RG500™

Mini Handheld RFID Reader

RFID Power in the Palm of Your Hand

The Northern Apex RG500 is a cost effective UHF RFID reader that fits in the palm of your hand. Unlike other “mini” readers, the easy to read RG500 LCD display **shows you data without connecting to another device**. You scan it, you see it!

Once your item is read, the RG500's built in Bluetooth connectivity can **transfer data to a host device**. If your application requires **reconciling or pulling data from another source** you can do that and display it right on the RG500— it's simple, easy and reliable.

The RG500 can be used for item identification, inventory, dynamic pricing applications, check-in or check-out, and much more. It is at home on the retail floor or factory floor or anywhere.

RFID Power in the Palm of Your Hand!
